

## Predictive Profiling Training

**"Profiling behaviors and situations is the foundation for every security procedure. "**

Chameleon offers the only curricula in the market today that provides a systematic approach for Detection of Suspicion, Determination of Threat and Deployment of subsequent procedures. This unique course goes beyond "observe and report". Predictive Profiling is a different approach that starts from the point of view of the aggressor and is based on actual aggressors' methods of operation.

### **CUSTOMIZED TO YOUR PROTECTED ENVIRONMENT**

Chameleon's Predictive Profiling methods are applicable to virtually any environment and set of security requirements. If you have special needs, the course can be built for your specific environment and resources.

### **The course covers the following topics:**

- Basic terminology
- Threat vs. Suspicion vs. Risk
- Detection of suspicious activity
- Marking to Getaway - The aggressor's method of operation
- Defining and meeting a security objective
- Open Environment Security
- Screening of people and objects in access control
- Aggressive Intentions vs. Aggressive Means
- Dealing with a Suspicious Object or Person
- Security Questioning
- Determining deployment procedures

### **Who should take this course?**

Security professionals, executives and law enforcement can all benefit from this introduction to Predictive Profiling.
