

December 1, 2011, for immediate release:

## **SafetyLine® Enlists the Commissionaires Victoria**

**Tsunami Solutions Ltd.** is pleased to announce **Commissionaires Victoria** is incorporating the *SafetyLine Lone Worker Monitoring Service* in their offerings to protect their clients' employees who work or travel alone.

**Commissionaires** are Canada's premier security provider and have over 19,000 employees, some of which are working alone. They have protected people and property for clients in both the public and private sectors, from coast to coast for more than 80 years.

Commissionaires' core strengths are rooted in their military and police culture which fosters discipline and the ability to detect, prevent or defuse conflict.

*After much research, SafetyLine* has been adopted to help protect their clients' employees in the course of their duties, provide a safer working environment, and to meet Government legislation as it relates to job safety.

**Commissionaires Victoria** is now an authorized agent of the *SafetyLine Lone Worker Monitoring Service*, in order to help their customers comply with Working Alone Legislation.

*"The decision to market the SafetyLine safety monitoring system was taken after we discovered how easy it was for employees to use and how reliable and cost effective it was compared to the manual system that most clients have in place to monitor the safety of employees that work or travel alone."*

- Stan Verran (CEO, Commissionaires Victoria).

### **About SafetyLine®**

[www.SafetyLine.ca](http://www.SafetyLine.ca)

*SafetyLine* has proven to be the most effective tool to automatically monitor the safety of employees and to notify a live person of potential Emergency situations. This Automated employee monitoring service uses telephone, mobile and web technologies to provide the most reliable and affordable solution. It helps the employer meet both Government Regulatory Requirements and their moral obligations of protecting employees who work alone or in hazardous situations. *SafetyLine* is ideal for all sizes of organizations for local, national, and international coverage.

Throughout the workday, employees "check-in" to *SafetyLine* to report their status. Monitored employees can connect through a number of existing communications devices: phones, SmartPhones, GPS & Satellites as well as computers. In the event of a Non-Response or Panic situation, *SafetyLine* contacts live monitors with all information available for a quick response – history, GPS location, voice records and more. Emergency Rescue procedures can then start quickly and efficiently.

### ***About Tsunami Solutions Ltd.***

[www.TsunamiSolutionsLtd.com](http://www.TsunamiSolutionsLtd.com)
